

# A Deck You Can Enjoy Rain or Shine

*A Gorilla Deck® G3 makes a beautiful addition to any home, offering an attractive, low-maintenance deck that would make any homeowner proud, but the beauty of a Gorilla Deck G3 isn't just what's on top. The beauty also extends below its surface... thanks to Gorilla Deck G3's revolutionary water-shedding technology.*

## Like Having Two Decks in One

The heart of the Gorilla Deck G3 system is its patented (Patent No. 6,324,796) interlocking design. This innovative system creates a water-shedding surface that prevents water from traveling below. Unlike other decking systems, Gorilla Deck G3 channels water to the sides of the deck, not through it. This unique water-shedding design helps keep the space below the deck dry, even on rainy days. Whether the homeowner wants to use it for storage or an additional entertainment area, the space below Gorilla Deck G3 is as useable as the space above it. It's like having two decks in one. The Gorilla Deck G3 is not intended for roofing applications.

## As Strong As It Is Beautiful

In addition to helping keep the below-deck space dry, Gorilla Deck G3's unique interlocking design also provides added strength. While traditional deck designs rely on the strength of each individual plank, Gorilla Deck G3's interlocking design reinforces the surface by locking all individual components into a single unit. The result is a deck that's so strong, it's *tough enough to take it.*

## Going Green to an Extreme

Homeland Vinyl Products, Inc. is one of the largest producers of vinyl extrusions in the industry. We believe going green and great products can go hand in hand. While we engineer our profiles to maximize performance and value, we also keep in mind that we must do our part to help preserve the environment. That is why we capture our vinyl waste and recycle it into specific substrates, such as what is used in Gorilla Deck G3. We shield our Gorilla Deck G3 with our extreme finish, ACCU-Shield®. ACCU-Shield is an advanced acrylic PVC blend specially design to significantly reduce the damaging effects of the sun. This is particularly important in areas with ultraviolet exposure in hot, low humidity climates. ACCU-Shield could make it the perfect deck for any project in areas that experience these conditions, and if ACCU-Shield can stand up to those extremes, just imagine how it can protect your Gorilla Deck G3 in less challenging climates. Simply put, there is no better protection for vinyl decking under the sun than ACCU-Shield.

## Safer and Virtually Free of Maintenance

Deck boards used in a Gorilla Deck G3 are made from a proprietary blend of UV stabilized vinyl making them virtually maintenance free. In fact, they're remarkably easy to clean, since the joints can't trap leaves, pine needles or other debris. They're also safer since they can't splinter like wood... and concealed fasteners mean there are no exposed screws or nails. Furthermore, because vinyl transfers heat better than most materials, Gorilla Deck G3's stay cooler to the touch even on the hottest summer days.

**"No better protection under the sun!"**

## Add a New Deck or Resurface an Old One

Gorilla Deck G3's low profile plank design (1-1/4") makes it ideal for retrofitting existing wood decks. Each plank measures six inches wide - similar to wood - and comes in lengths of 16, 20 and 24 feet. Its low profile and unique interlocking design make Gorilla Deck G3 one of the easiest and fastest decks on the market to install.

## A Lifetime of Beauty Perfect for Any Style Home

Homeland's Gorilla Deck G3 will never rot, split, or decay, and is impervious to insects and moisture. Every Gorilla Deck G3 is covered by one of the toughest warranties in the industry - a lifetime, transferable limited warranty\* - making it the right choice for any homeowner.

\*See warranty for details.

Beautiful, practical and easy to install... It's no wonder Gorilla Deck G3 is becoming the number one choice of contractors across the nation. Ask for it by name.

# Gorilla Deck G3 Is Engineered for Strength and Beauty

1-1/4" planks for a wood-like appearance

16', 20', 24' lengths for any size project

Interlocking planks help shed water and keep surface below dry

Extruded from highest quality PVC resins with ACCU-Shield

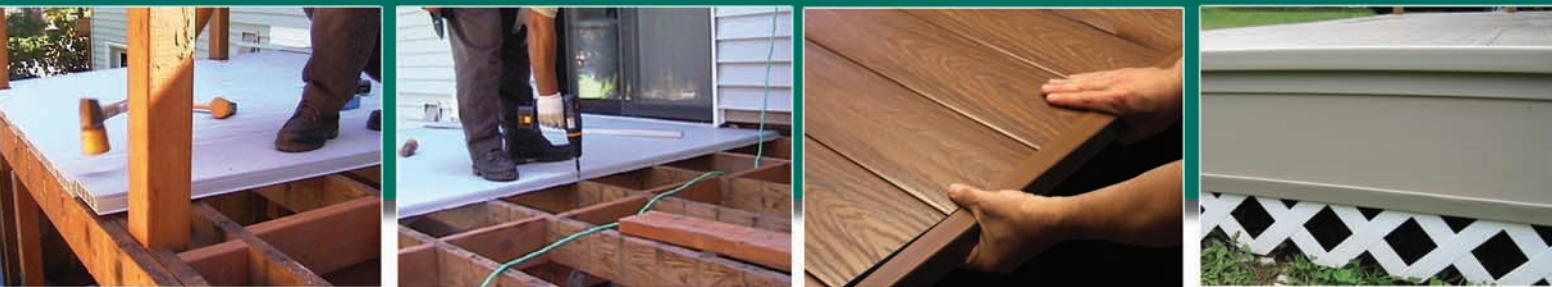

Low-maintenance surface that will never need painting

Interlocking design for added strength and easy installation

Concealed fasteners for clean, safe surface

Insect resistant, moisture resistant and will not rot, crack or split

**Installation is as easy as 1, 2, 3, 4**
